The Importance of Routine

A QUICK EXPERIMENT

Take a moment... please cross your arms.
Then re-cross them the other way.

How did it feel the second time compared to the first?

For most of us the second time feels odd. You have to consciously think about it and be more deliberate.

What would happen if you practiced folding your arms the other way every day?

It would become normal; something you can do without thinking about it.

How To Use the Metrics Sheet

Good News!
You've Already Done it!

The purpose of this sheet is to:

1. To specify the Process, the Problem, & the Challenge
2. To provide visibility to everyone as to how the process is performing on a daily basis

Focus Process:		Building the domino pattern								METRICS
Problem Statement:		In order to remain competitive in the market, the team needs to be able to produce a high quality product in less time.								
Target / Challenge:		200 dominos set up in 90 seconds utilizing 2 workers with a 100% topple rate								
Metric Tracking Instructions: Record your daily results. The color coded bars indicate whether we met the goal for the day. The height of the bars shows the trend for the month. Mark the results on the appropriate date column.										
Red - Did not meet goal Green - Met goal										
Time To Set Up Dominos	4:00									
	3:30									
	3:00									
	3:30									
	2:00									
	2:30									
	2:00									
	1:30									
	1:00									
	0:30									
		Round 1	Round 2	Round 3	Round 4	Round 5	Round 6	Round 7	Round 8	
# of workers to set up Dominos	4									
Total # of dominos set up (before toppling)	100									
Total # of dominos which toppled	50									
Topple rate (total # of dominos toppled / total # of dominos set up)	50%									
		Round 1	Round 2	Round 3	Round 4	Round 5	Round 6	Round 7	Round 8	

How to Use the *Obstacles* Sheet

1. Each round that your team doesn't hit your challenge, ask the question "what is preventing us?"
2. Document the answer(s) to that question along the left hand side of the "Obstacles" sheet. These are **obstacles** to achieving your challenge.
3. Each round that a specific obstacle occurs, color in another cell in that row and write the round # in that box.
4. Choose one obstacle that the group is going to focus on eliminating first.

OBSTACLES		Focus Process: Building the domino pattern		METRICS		End Date:	
Category / Reason							
Unwanted toppling	Rnd 1	Rnd 4					
Time to set each domino too long	Rnd 1	Rnd 2	Rnd 3	Rnd 4			
Others . . .							

Tracking Instructions:	Round 1	Round 2	Round 3	Round 4	Round 5	Round 6	Round 7	Round 8
# of workers to set up Dominoes	4							
Total # of dominoes set up (before toppling)	100							
Total # of dominoes which toppled	50							
Topple rate (total # of dominoes toppled / total # of dominoes set up)	50%							

What is preventing us from setting up the dominoes more quickly?

What is preventing us from having a 100% topple rate?

The Learning Cycles Sheet

1. You've chosen an obstacle to focus on eliminating. Seek to understand what the root cause of that obstacle is.
2. Decide on the next step your team will try in order to reduce or eliminate the root cause of this obstacle. Document the step and your expectations.
3. Implement that step in the next domino round and then document the outcome along with your learnings. What you learned should influence your next step.

LEARNING CYCLES (Using PDCA Thinking)

each row = one experiment

Rnd	Step	What we expect	Take the next step (conduct the experiment)	What happened	What we learned
2	Remove neckties	No Unwanted toppling		Unwanted toppling due to wristwatch	All dangling accessories need to be removed
3	Remove all dangling accessories (watches, necklaces, etc.)				

To Reinforce, Think of the Sheets This Way

METRICS

Puzzle Process: Building the domino pattern.

Puzzle Statement: In order to remain competitive in the market, the team needs to be able to produce a high quality product in less time.

Target / Challenge: 200 dominoes set up in 90 seconds utilizing 5 workers with a 100% toggle rate

Article Reading Instructions: Record your daily results. The color coded bars indicate whether we met the goal for the day. The height of the bars shows the trend for the month, with the x-axis as the approximate time taken.

Red - Did not meet goal Green - Met goal

Round 1	Round 2	Round 3	Round 4	Round 5	Round 6	Round 7	Round 8	Round 9	Round 10

# of workers to set-up dominoes									
Total # of dominoes set up (before toggling)									
Total # of dominoes which topped									
Toggle one batch of dominoes required - total # of dominoes set									
Set	Round 1	Round 2	Round 3	Round 4	Round 5	Round 6	Round 7	Round 8	Round 9

[illegible][illegible]

What's the process, problem, & challenge?

What's the current performance of the process?

What's preventing you from achieving the challenge?

What's the next step to eliminate your selected obstacle? And...

What did you learn by taking that step?

Instructions for Round 1

- First, Number off! 1, 2, 3
- Each table will work together to build a product for our company's customers. Our product for this exercise is a completed domino pattern shown in the picture below.
- Customer Requirements & Rules:
 1. You must produce the pattern below with the quantities shown below
 2. Use as many as 4 team members for up to 4 minutes in order to produce the pattern
 3. At the end of the 4 minutes, count how many dominos were set up
 4. Next, you must topple all of the dominos by only touching the first one
 5. Next, gather your remaining metrics and document it on your Metrics sheet
 6. Return your dominos to the starting position when finished

Starting Position for Each Round

- 4 rows, with 50 dominos in each row (as seen below)
 - Must be in this exact formation, no gaps, etc.

Tracking Metrics

- At the end of each round, the metrics you want to gather are:
 - Time used to set up the dominos
 - # of workers
 - Total # of dominos set up (before toppling)
 - Total # of dominos which toppled
 - Topple rate (total # of dominos toppled / total # of dominos set up)
- Use the sheet in your packet labeled **Metrics** to document this data.
- You may want to assign one person on the team to be the metrics tracker
